Loy Surveys

Press Release

Loy Surveys replace survey equipment

Land Surveyors operating without an assistant will use the very latest technology to gain maximum productivity

Glasgow , February 09 2006

Loy Surveys, have placed an order valued at £400,000 with Trimble dealer Survey Solutions to replace their entire fleet of survey equipment. The new Trimble S6 robotic/ reflex survey instruments and Trimble R8GNSS receivers together with the introduction of a new standard Trimble TCS2 handheld interface will provide real-time computing in the field. Trimble R8 GNSS now supports both the next-generation GPS L2C and L5 signals and GLONASS L1/ L2 signals.

Loy Surveys, Managing Director Jim Loy says that “they expect their customers to see the benefits right away with the reduced workflow leading to faster deliver times than were possible in the past.”

All GPS receivers will be linked to the new OS GPS network for instant access to the Ordnance Survey National Grid and level datum at the click of a button.

“Its all part of Loy Surveys aim to offer its customers the best possible service at a competitive cost” said Jim Loy

For Release 9 a.m. GMT, February 09 , 2006

Background

Jim Loy established Loy Surveys Ltd in 1985. In his position as Managing Director he has driven the company forward ever since. The company quickly established its reputation through an ability to complete contracts on time to the required standard at competitive prices.

At Loy Surveys we only use the most up to date and sophisticated technology, guaranteeing customers cost effectiveness, quality and accuracy. To ensure our customers gain maximum benefit from technology, Jim Loy, regularly attends exhibitions and conferences looking for ways to improve and extend the range of services.

Loy employ a dedicated staff of twenty people at their main UK support office in Renfrew, near Glasgow Airport. Our size enables us to compete on equal terms with both large and small firms. At Loy Surveys we like to think of ourselves as big enough to matter and at the same time small enough to care.

We operate throughout Scotland, the UK and overseas, mobilising within one week and in many cases quicker.

We have completed over 8,000+ surveys in 21 years for our diverse 1,500+ customer list which includes contractors, architects, engineers, local authorities, estate developers, oil companies, utilities and central government agencies and departments.
